

BOTSWANA HOTSPOTS WIFI PRICES AS AT MARCH 2017

The Botswana Communications Regulatory Authority (BOCRA) herewith publishes WiFi Internet prices as charged by various retail companies providing services under the Botswana Hotspot network. The prices are as at **March 2017**.

Botswana Hotspots is a network of high-speed wireless Internet deployed by Botswana Fibre Networks (BoFiNet) in areas that include Kasane, Maun, Francistown, Palapye, Serowe, Mahalapye and Gaborone. Subsidised by the Universal Access & Services Fund (UASF) in 2015, the project involves connection to the wholesale network, and resale of WiFi offerings by Internet Service Providers (ISPs) to enable provision of public wireless Internet at reduced retail prices. The services are available at shopping malls, bus stations, hospitals and airports in areas stated above. Other towns and villages are to be covered in the future.
