The above table presents statistics from operators from year 2008. BTC FIXED is a fixed telephony operator. BTC BeMOBILE, MASCOM WIRELESS and ORANGE BOTSWANA are mobile cellular operators.

The Botswana market defines an Active Mobile Cellular Telephone Subscriber (postpaid + prepaid) as a user of a mobile phone or a fixed cellular terminal, who is either subscribing through a fixed monthly fee or is using a prepaid card of a public mobile telephone service that uses cellular technology. The subscriber must be able to use their mobile cellular telephone to receive or make calls( including emergency and service calls) and they must have participated in a revenue generating activity (i.e. receiving a call, making a call, recharging airtime) in the past 90 days in case of a prepaid plan.
