**NB:**

- The procurement plan is prepared to promote transparency and to allow bidders to prepare themselves for tenders and to improve bidder responsiveness to tender requirements.
- The Plan is published for information only and the Authority shall not be held liable for any changes in the procurement plans that might result from changes in the financial situation or priorities of the Authority during the course of the financial year. Thus, contractors should always verify that they have the latest version of the procurement plan at all times as the Authority will update the plan when necessary.
- It should further be noted that notice of tenders shall follow the current system of releasing Invitation to Tender (ITTs) to the public depending on the method of procurement that would be fitting at the time.
- Cost estimates may only be provided in line with the procurement methods that allow for such and bidders will still be expected to compete on quality and cost.
